Our Warranty is Real!

**The reasons we can claim
“GuttaFilta™ is the
only product that works” are...**

People get confused with the warranty. Mesh, for example, offers a 21 year warranty. We only offer seven years warranty, and yet our warranty is worth more to you. The 21 year warranty relates to how long the product will last — not that it will work. Over time it will not because debris build-up will occur in your gutters.

Once this build-up occurs there will be issues. For example, to remove the mesh to clean the gutter will void the warranty.

So if the gutters block-up with smaller debris in two years requiring them to be cleaned, the

warranty will become void. This means the real warranty is not 21 years at all. In fact, it is just two years. (or less or more depending on when you need to clean the gutters.)

When the gutter protection system is glued or screwed to the roof the roof warranty becomes void. (If I was a roofer there is no way I would warrant any roof where other people came in and screwed holes into it!)

Another significant issue is metal screwed to a metal roof causes corrosion. So even if the mesh lasts the roof won't!

So the 21 year warranty sounds good, but really it means nothing!

GuttaFilta™ works and if it doesn't we clean any debris build-up in your gutters for nothing. No one else will do that. We do this because GuttaFilta™ really works and we are prepared to back it by putting money where our mouth is.
